New Evidence Reveals GA Audit Fraud and Massive Errors

ATLANTA GA – Petitioners in a lawsuit organized by VoterGA to inspect Fulton County ballots have added **stunning claims** in their [amended complaint](#) and provided new evidence from public records that show Fulton County's [hand count audit](#) of the November 3rd 2020 election was **riddled with massive errors and provable fraud**.

Most new allegations and evidence are based on a VoterGA data team's analysis of Fulton's November 2020 [mail-in ballot images](#) made public after petitioners won a court order on April 13th and VoterGA lobbying efforts led the Georgia General Assembly to make all images public under Open Records Requests beginning March 25th.

The team's analysis revealed that 923 of 1539 mail-in ballot batch files contained votes incorrectly reported in Fulton's official November 3rd 2020 results. These inaccuracies are due to discrepancies in votes for Donald Trump, Joe Biden and total votes cast compared to their reported audit totals for respective batches. Thus, **the error reporting rate in Fulton's hand count audit is a whopping 60%**.

One type of error discovered involved duplicate results reporting for batches of ballots. The team found at least 36 batches of mail-in ballots with 4,255 total extra votes were redundantly added into Fulton Co. audit results for the November election. These illicit votes include 3,390 extra votes for Joe Biden, 865 extra votes for Donald Trump and 43 extra votes for Jo Jorgenson.

But it is not simply a case of errors. **The VoterGA team found 7 [falsified audit tally sheets containing fabricated vote totals for their respective batches](#)**. For example, a batch containing 59 actual ballot images for Joe Biden, 42 for Donald Trump and 0 for Jo Jorgenson was reported as 100 for Biden and 0 for Trump. The seven batches of ballot images with 554 votes for Joe Biden, 140 votes for Donald Trump and 11 votes for Jo Jorgenson had tally sheets in the audit falsified to show 850 votes for Biden, 0 votes for Trump and 0 votes for Jorgenson.

Fulton Co. failed to include over 100,000 tally sheets, including more than 50,000 from mail-in ballots, when the results were originally published for the full hand count audit conducted by the office of the Secretary of State for the November 3rd 2020 election. Those tally sheets remained missing until late February when the county supplemented their original audit results.

Petitioners contend that Fulton County did not provide drop box transfer forms for at least three pickup days when obligated to do so via an Open Records Request. Those missing forms are still needed to provide chain of custody proof for about 5,000 ballots.

The VoterGA data team also found over 200 Fulton County mail-in ballot images containing votes not included in the hand count audit results for the November election. All these anomalies are now included in the Fulton County ballot inspection lawsuit as additional counts of how the Equal Protection and Due Process Constitutional rights of Georgia voters were violated.
